June 2022

ATTENTION PARENTS:

Senior level students (Grades 10, 11 & 12) who plan to take math and science courses at Melville Comprehensive School (MCS) are encouraged to use a T1 calculator at home and school to complete their homework assignments. At present, students have access to some school calculators.

The Math and Science Department at MCS is recommending two options for students taking regular math and science courses.

Option # 1

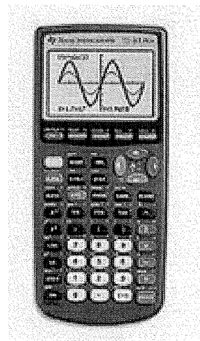

Students can purchase their own T1 83 plus or any T1 84 series calculator for the fall of 2022. The calculator will cost \$100 - \$200 new (shop around online; used ones can cost \$50 - \$100). This option may be an asset to a student planning to go to post-secondary education after graduation or for families with more than one child.

Option # 2

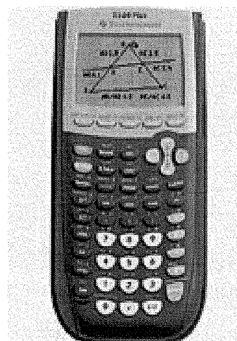

Students can sign out a T1 83 or T1 84 plus calculator from our library. There are a number of calculators available for loan from the library. When a student signs out a calculator from our library, we will take a deposit of \$50 for the T1 83 plus or a deposit of \$150 for the T1 84 plus calculators. A post-dated cheque must be made out to Melville Comprehensive School for June 30, 2023, in order to borrow a calculator for the school year. The cheque will be returned when the student returns the working calculator (with reasonable wear and tear). Students must supply four AAA alkaline batteries to use these calculators.

If you have any questions or concerns, please contact Ron Lutz by email ron.lutz@gssd.ca or by phoning the school (306) 728-4181.
